Potential Commercial Project
Architects, Engineers, & Owners

Re: B&B Builders, Inc.

I would like to recommend that you consider B&B Builders, Inc. as your general contractor. This recommendation is based on the history that Stockman Bank has with B&B Builders over the past 20 years. We have done substantial interior and exterior building projects with great success. What has amazed me is the outstanding attention to detail, especially the sensitivity of scheduling to accommodate our being able to stay open and provide uninterrupted service to our customers. This sometimes required B&B to work evening swing shifts and night shifts along with several week-ends.

B&B Builders, Inc. understands the importance of uninterrupted service and scheduling.

I have listed below the construction projects that B&B Builders have successfully completed for Stockman Bank:

1. Removed the old teller stations and installed new teller stations at our main bank.
2. Changed the location of our front entrance which included abandoning a stairwell, building 2 new offices and installing a new front entrance with a new stairwell complete with excavating.
3. Remodeled our main bank commercial, real estate, and consumer loan departments. This included all new flooring, wall coverings, officer desks and credenzas, moved our north exterior wall out to the sidewalk (approximately 6' x 50'), added 5 new individual offices, replaced all loan secretary desks including our reception area and customer waiting area.

If you have any questions regarding the excellent workmanship, finishing and project management that we have experienced with B&B Builders, Inc. please advise.

Sincerely,

Garth N Kallevig
President Sidney Office
